Observability / monitoring

SCRUM

WORK EXPERIENCE

Senior Software Engineer - Front End

Farfetch

Scrum routine: refinement, planning, daily, review, retrospective.

June 2022 - current / Hybrid

- As a senior software engineer on the FPS team, I am involved in the rewriting process of their digital solutions using technologies such as Next.JS, Remix, and Typescript. Furthermore, I closely work with the head of engineering to further develop strategic technical solutions for FPS products.
- Development of an E-commerce Project for an American fitness footwear and clothing brand.
Created the project foundation with support to Session, Internationalization, and Logs implementation (New Relic and Logz.io). I was part of the team responsible for the Go Live step.
Created documentation about all new features.
Stack: Remix (framework based on React), Typescript, remix-i18n, Express, Redis, Jenkins, Octopus, Docker, Unit test (Jest). Observability and Monitoring using New Relic and Logz.io.
- Development of a Multi-tenant project for a big luxury fashion group. A mono repository was responsible for handling different companies of the group.
Stack: React, Typescript, Internal Boilerplate using the company Design System, Razzle (to handle several projects), Webpack, Jenkins, Unit test (Jest).
- Created a presentation to teach team members company standards and best practices in Next.js and Strapi. This helped the build of a new internal portal for developers.

Senior Software Engineer

Mindpool

Scrum routine: refinement, planning, daily, review, retrospective.

Oct 2021 - May 2022 / Remote

- Developed a new website company from scratch: mindpool.com (the old version can be accessible here: <https://web.archive.org/web/20220521180126/https://www.mindpool.com/>)
- Used Strapi for the content management system.
- Created the user experience that fetched, parsed, and formatted analytic data, and relayed it into React components.

- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.
- Stack: NextJS, Strapi, styled-components, Typescript, Jest, React Testing Library, and Storybook.
- Talks with the designer and stakeholders to better understand the business rules and UX.
-

Senior Frontend Engineer / JavaScript Chapter Leader

Accenture / Concrete Solutions

Scrum routine: refinement, planning, daily, review, retrospective.

February 2017 - October 2021 / Belo Horizonte, MG - Brazil

- Developer Lead, knowledge sharing, mentoring other developers to improve their technical skills, helping with interviews, and analyzing challenges.
- Development of a Brazilian global personal care cosmetics group's project:
- Developing setup for new countries for Latin America expansion to support all consultants from those new places.
- Given support to the backend team on Express, Knex, and Postgresql.
- A highlight there was the performance improvement after a checkout page refactor.
- It created new components, reduced the dispatch call to several actions on the Redux side, and used React Lazy and code splitting to get 0.15 points on Apdex.
- Stack: Express, Knex, PostgreSQL, Unit tests (Jest), React, Redux, Material UI, git, Jenkins, Kibana.
- Scrum routine: refinement, planning, daily, review, retrospective.
- Development of PWA for an NGO.
- It created a PWA in React to handle the data from cards that community leaders received.
- Some features like getting the location from Navigator API, photo upload, and API consuming.
- Supported the backend team helping with payload creation.
- Development of CRM and Back Office to support a mobile application (Digital Bank).
- Stack: React, GraphQL, Jest, hooks, Redux, styled-components, prop-types.
- Refactor of a Brazilian bank project.
- It helped the QA team with selectors to use on the Cucumber tool.
- Stack: AngularJS, WebPack, ES6, Babel, Unit tests (Karma), API data, CI, Git, CSS Modules, Standard javascript style guide, and Bootstrap.

Senior Frontend Engineer / Tech Lead

Stefanini

June 2016 - Jan 2017 / Belo Horizonte, MG - Brazil

- Besides developing several projects, I was a leader to three other developers, two interns, and one junior developer.

- I learned about XAML and how Xamarin works because I had to integrate it with C#.
- Some projects I used: AngularJS, and Bootstrap.

Frontend Developer

Hotmart

Scrum routine: refinement, planning, daily, review, retrospective.

Nov 2014 - Apr 2016 / Belo Horizonte, MG - Brazil

- Worked in the new platform with Rest API and Meteor integration, Bootstrap layout, and grid.
- Given maintenance on old monolith projects.
- On the release of the new platform, we created A/B tests, and feature toggles related to user types, if producer, affiliate, or buyer.

Frontend Developer

CI&T

Scrum routine: refinement, planning, daily, review, retrospective.

Oct 2013 - Nov 2014 / Belo Horizonte, MG - Brazil

- Customized Primefaces JSF frameworks to work in Internet Explorer 8. The client wanted some features to work in IE8 that caused trouble and didn't work, for this I had to rewrite some functions. HTML, CSS, vanilla JS, and Primefaces for JSF.

Frontend Developer

Plan B Comunicação

Jul 2012 - Sep 2013 / Belo Horizonte, MG - Brazil

Frontend Developer

useInternational LTD

Scrum routine: refinement, planning, daily, review, retrospective.

April 2010 - Jun 2012 / Belo Horizonte, MG - Brazil

- The first contact with Scrum methodology.
- Developed HTML, CSS, and JS, code from the layout to JSF.

Frontend Developer

Meritia

Apr 2007 - Nov 2008 / Belo Horizonte, MG - Brazil

Frontend Developer

Sense8

April 2009 - Mar 2010 / Belo Horizonte, MG - Brazil
